

# GREX fry oil usage manual

Measure 50 ml of GREX fry oil per 18 L of cooking oil.

While stirring GREX fry oil with a long object such as chopsticks, add it and mix. If you purchase a lot of cooking oil and mix it in advance, the work efficiency is the well, and the effect will be the best too.

After mixing GREX frying oil with cooking oil in advance, cover the top of the can with a vinyl or tin lid to prevent foreign matter from entering the can.

After 24 hours have passed after mixing, clean the fryer as usual, and after cleaning, put the GREX fry oil mixed cooking oil prepared in advance into the fryer and use it as usual.

## 【Data collection】

Please collect data every day. In particular, inventory at the start, quantity purchased, and inventory at the end are mandatory.

Repeat this every day.

Every day, clean the oil and fryer as usual after business hours. After cleaning, return the oil to the fryer, add GREX fry oil mixed oil to a certain amount, and stir with long chopsticks to mix well. This will refresh the oil by the next day.
